were, will price be restored, before this crisis could be carried out. There are a good many people gathered about at present in the place where the people live in town do congregate, the most important of the situation is the correspondence between Charles Napier and Mr. Graham, and the movement of Mr. Bakewell. As to what it is now my weeks since we stated that the Federation of the Manchester men had formed a union. The report was that that union has been cemented since the recent meeting of the Parliament meets. Lord Palmerston will be confirmed by Lord John Russell, Sir James Graham, Mr. Gladstone, Mr. Henry Herbert, Mr. Cardwell, Mr. Cobden, and Mr. Bright.

perspective tails. We believe that this will be the foundation of another union. The Tories, feeling themselves safer in the hands of Lord Palmerston than those of Mr. Disraeli and Lord Derby with their numerous crotchets—allevy as both undoubtedly were administered honorably and in an English spirit—the papers have been very much taken up with the correspondence between Sir J. Graham and Sir C.

paper, which the latter has published in the columns of the *Morning Advertiser*. That correspondence has also been made the subject of much oral discussion, and we cannot imagine, from the general tone of public opinion, that Sir Charles has at all improved his position by the course he has pursued. His publication of "private" letters is universally condemned; and Mr. Grant, the editor of the *Morning Advertiser*, does not escape censure for consenting to make his paper

Nor has there been any improvement by the substitution of Admiral Dundas for Sir Charles Napier. There has even the same inaction, the same want of enterprise, the same discreditable employment of a

on enterprises that have rather the character of
surrounding adventures than deeds of gallant daring.
There is one thing connected with the correspondence
that should not be overlooked. Sir Charles Napier
asserts that he received, simultaneously,
despatches from the Admiralty and a letter
from the Times, both containing admonitions
of a similar character. The letter is not published,
but the editor of the Advertiser avers that he has it.

and it is his possession. The deduction that he made as a friend drew from this circumstance is, that if the Admiralty rules the fleet, the Admiralty itself receives *ad receive*] its impulses from the *Times*. On the asserted existence of this letter, be it observed, the *Times* itself is silent, though the editors cannot be ignorant of what has been written about it in the *Morning Advertiser*, and said of it at the clubs. As to the conduct purposed to Mr. Buxwell, nothing could

more unjust. He says that the medical preparations, at a certain hospital, on the memorable 18th of June were most inadequate; and whilst he is labouring under illness at Neuari, the charges are investigated in his absence at the Crimea, pronounced to be false and calumnious; and he is dismissed the service without a hearing. To a remonstrance from his father, Mr. F. Peel returns a most illogical and unsatisfactory answer, and the assistant-

person is refused all redress, though he persists in the truth of his charges, and offers to prove them, if allowed. The result is, that the public believe the charges to be true, look upon Mr. Baker as an ill-used man, and consider that the conduct of the military authorities abroad, and of the government at home, has been most oppressive and unjust. The life of Louis Napoleon has again been interrupted by an assassin, but, by a providential inter-

PORT STEPHENS.

group, 3rd December, 1855.—We have been visited
by several thunderstorms, which have caused par-
tial damage to the wheat and hay crops. Very fortu-
nately, the country was extensively burnt by the recent
fires in every direction, and the late rains and cloudy
weather will produce abundance of grass. The Australian Agricultural Company have placed
a gang of men on the mountain road from New Reg-
ent, who are at present busily employed at clearing

the sidings on Hungry Hill—the only point where danger was apprehended, there being scarcely any room for a team to proceed with the river alongside in safety. The road was now cut eighteen feet wide, and the gang have directions to ease the several pinches, and throw bridges over the worst of the gullies. A blacksmith is retained at the foot of the mountain, and to a steady company the Company will hand over a horse of ex-

accommodation as an inducement to reside on the spot. It is the first stage for horse men from Murphree's, at New England, and being a place of great call, it is likely to prove a lucrative concern.

An inquiry was held on the 1st instant at the West Pool, Tullagherry, before Mr. T. Cook, the coroner, and a jury of twelve, on the body of Harriet Hampton, a woman and there lying dead. It appears that a violent family quarrel the deceased determined upon self-

struction, and on Thursday, the 29th November, after partaking of dinner with her husband and a man named John Sutherland, she got a tab of water about 3 p.m., and washed herself all over; she then dressed herself in her night clothes, wrote a letter to her husband exonerating him from all blame in her death, swallowed a dose of laudanum, and laid herself on her bed to die. It was some time before her husband found the letter and phial on the

When he immediately despatched Sutherland to the doctor, who resided at Stroud, a distance of about four miles. Medical aid was of no avail, although the doctor arrived nearly three-quarters of an hour before death took place. Unfortunately, he had no stomach pump. Mrs. Hampton was about 30 years of age, and had been married about two and a-half years. She came out under Dr. Lang's surprise as a governess and needlewoman. Her manners were

We have had two or three bad accidents of that kind, which, with the above, have created a little excitement in our peaceable village. About a fortnight ago Constable Tipping was returning home from a tour of inspection, when the limb of a tree fell in front of his house, causing it to shy suddenly, whereupon Tipping was thrown violently, fracturing the cap of the hip joint. He is now in the hospital at night, and was picked up by the

On Thursday, October 18, a young man named William Hinton, a blacksmith, in the service of the Australian Agricultural Company, met his death under the following circumstances:—On Wednesday, the 17th, he started up the country to see his friends, and about twenty-five miles from Stroud met his brother-in-law. They proceeded together along the

anks of the Barrington, and when about
two miles from their destination the latter, it
appears, dismounted to adjust his saddle cloth,
Clinton centering on ; he had a small hunting
whip in his hand, and while passing through a little
crab of saplings, the lash of the whip got fast to one
of them, and he was pulled off, falling on the back of
his head, and fracturing the base of the skull.
Assistance was immediately procured, and he was car-

He died to his brother-in-law's farm, where he lingered till six o'clock on the morning of the 17th. A magisterial inquiry was held by Mr. J. C. White, J.P., and the body was conveyed to Stroud for interment. Minion is much regretted, being a most civil, obliging fellow. He has left a young widow, with one child, and she is about to be again confined.

The Company have lately let several farms on the Harrington River, containing some first-rate soil. We

He is, therefore, soon to have a large population around Gloucester. There is a good opening for a medical man; one of active disposition, consulting in all matters, and attentive to his business, and if he wanted a farm, and combined agricultural pursuits with the medical profession, he might live comfortably.
